

Chiller Energy Saver

from: EnviroTech Trading Limited

Price: £0.00

Date: 2019-11-17 00:54:19

Expiration Date: 0000-00-00 00:00:00

Description

Our AC Chiller Energy Saver System makes better Energy Savings than a Chiller Plant Manager (CPM) without all the hassle!! AC Chiller Energy Savings are achieved by reducing the load on the AC Chiller Compressors according to the cooling requirement within the building and our systems are also ideal for assisting for obtaining LEED or Estidama points. This intelligent AC Chilled Water Chiller Energy Saver System will analyse the temperature of the AC Chiller Plant but still keeping the required air conditioning cooling levels as well as lengthening the life of the AC Chiller Compressors! Easy Installation The EnviroTech AC Chiller Energy Saving System will be installed by an air conditioning controls engineer who will install and connect the UK Advanced Chiller Energy Saving System to the Chiller Plant which measures the return chiller water temperature. Once connected to the output from the chiller temperature reset the Advanced Chiller Energy Saver System will now prevent the Air Conditioning Chilled Water Plant unit from over cooling or allow unnecessary loading on the AC Compressors. The AC Chiller Energy Saver will operate for many years and is primarily guaranteed for three years with extended warranties available with a service contract. There is no guess work as the “real time” Advanced Chiller Energy Saver System (CES) is fully automated requiring minimal maintenance. The Chiller Energy Saver system is proven and highly effective on a wide range of Air Condi
